Ex-Congressman, G. W. Stone, it is thought will enter the race for Governor.

At the Montgomery did not get that Judgehip in the Indian Territory and hence the proposition of \$5,000 are lost also. The way of the politician is hard indeed.

The greatest little educator on the silver question is "Columbia Financial School." If you haven't read it get it and read it. It will open your eyes on the money question.

It is reported that business has somewhat revived since the adjournment of Congress. Well, it is only Congress didn't get out of the way some time ago and let business go on.

There is still some hope for the tobacco growers, yet, notwithstanding the awful way they put up over the low prices. A household of the weed sold in Louisville last week at \$22.50 per hundred.

In the State Convention doesn't get a plank in its platform for free silver there will be a mighty row and a ramp. Democrats will be heard on this question and there are enough of them to make it hot for somebody.

With all due respect to banker J. W. Lewis, the News have been to visit with him on the "elastic line." There is too much elasticity now. What the country needs is a sound stable currency, sufficient to do the business of the country, and free from the control of National Banks.

Gov. William Vest is in great an admirer of gold as any man in this town and owns as much of it as any other man, yet he is not wedded to it to the exclusion of silver. He thinks as does the News that it has been badly treated by the gold bugs and ought to be restored to its former position as one of the redeeming moneys.

When an old-line Fire Insurance Company like the Astor resorts to "tricks in trade" in the payment of its losses, as it did in the case of Ford Owen, it shakes the confidence of the people and leads them to believe that there is no good in any of the companies. If there ever was a square loss, and one which ought to have been paid in full, it was Mr. Owen's. Yet the adjusters got together and cut him down \$200, sick citizens, these adjusters.

The earnings of all the railroads in this country for the year 1904 show a decrease of \$610 per mile compared with the earnings of the four preceding years. Notwithstanding this great depreciation of the business of railroads the managers are all, with a few exceptions, for the single gold standard, the very thing that is helping to run down their business and put it into the hands of their enemies, the gold bugs.

The Young Soldier Ambitious to Shine as An Author.

## WRITES A HISTORY OF CORSICA.

Seeks a Publisher In Vain. Revisits His Native Land. Despotie Treatment of His Kinsfolk.

At This Period Displays Willfulness and Gloom.

(Copyright, 1886, by John Clark Ridpath.)

V.—PLANNED BY OMBERT.

The inscription in Lyons called itself before the arrival of Lieutenant Bonaparte's contingent. The municipality proved itself sufficiently strong to put down the insurgents without the assistance of the military arm. Fighting there was none. Napoleon's company, arriving in due time, was stationed in the city for a month. It was a small beginning of war for him who was destined, with less than a decade, to lead a victorious army over the Alps into Italy.

The disturbance at Lyons put a date to Bonaparte's career at Valence. He had remained in that place from the fall of 1785 to August of 1787. This period of twenty-three months, though obscure in his manifestations, was one of the most important in his life. It was the transition from youth to maturity. At this stage in the lives of men, the mind passes rapidly from one condition to another. Particularly in this time it finds how the mood and genius the attributes of the person concerned.

The ambition of the young officer now shot out in several directions. Deeply impressed with the fame and power of the great authors who had preceded him, then setting the world afire, he, too, would be an author. Such was the quality of his thought processes that he never distrusted himself in anything. Before the end of his eighteenth year he conceived himself able to write a history of Corsica should be his theme. He would write the annals of his native land in no philosophical manner as to place him alongside of the Abbe Raynal. He went so far as to address a letter to that august personage, telling him that, being, though a youth, was already a writer. He begged the historian to excuse his audacity. He flattered him by saying that indulgence, extended to a neophyte, was a

mark of genius. He was not aware that the first two chapters of his alleged "History of Corsica," the cacophony of being surprised by the quality of the rhetoric and the message of grammar.

We shall suspect that the bottom motive of this business was not the hope of being a historian, but rather the desire of having companionship with a great man. However this may be, the Abbe Fleury, Napoleon, wrote to him, advising him to study further, and then to write his history. He was not to write the history of Corsica, but the history of Corsica, and the first time falling in love, determined to write a novel. At the house of Madame de Combaux, he made the acquaintance of her beautiful daughter, and fell in love with her after the manner of all young Frenchmen. The flame of this passion presently went out, but traces of it are seen in his correspondence until what time—coming to live in the beautiful Combaux—he turned poet, and composed love as a mockery, and in particular as the devotion to human nature.

In the midst of the fifth gleams of the celestial life may be seen the first of those that flame but are not extinguished. The student Bonaparte, however, was not really. He supplied himself with the works of the leading authors of the age, and devoured them with the rapidly of one starving. He made himself familiar with the writings of Voltaire and Keats, and followed through the names of the new French literature, and the other through the intricacies of practical finance. For months together, in the solitude and alone, he was at night he was, with book in hand, musing on his work, pondering the margins, approving and condemning, and according to his judgment or whim. There were a time in his life when he went within his grasp a great amount of intellectual products than during the latter part of 1788 and the first half of the following year.

Coinciding with the date of the Lyons episode, came a military order sending the Regiment La Fere from Valence to Donal, in French Flanders, three hundred and ninety miles distant. Here Napoleon found himself exposed to a series of humiliations and unfamiliar hardships. In his correspondence he complains bitterly of his situation. He goes on and on about his mind and body, and the effects of it lasted for several years. His misadventures became extreme and he sought by every means in his power to escape from the situation. He would get away or kill himself. No one could see his reason was that he should go elsewhere.

The Bonaparte family in Corsica had fallen by this time into desperate straits. Joseph had undertaken to build up a wine-trade with Italy, but had failed—was insolvent in the matter. The family was in straits, was doing his best to get out of them.

Among the subjects for discussion at the Goshen Municipal Meeting is "What part may female members take in public worship, and in church work."

The subject will doubtless be handled, but our opinion is that women and work is in the hands of a higher power. Nearly two thousand years ago the communists "Go ye into all the world and preach the Gospel to every creature."

Mr. Sam Smith has moved his family from Guston and now holds forth his "attractions" at the old stand. If Mr. Smith would take his barrels and empty the contents into the big barrel and fill the large store room with dry goods these large handsome windows with bright pretty millinery goods, ribbons, handkerchiefs, etc., so dear to the feminine heart. We feel sure he would receive the best of the better part of the community who would rejoice to see a much needed enterprise, as well as a new one less on to our little town.

Rev. W. R. Cullom filled his regular appointments last Sunday at 11 a. m. and at 3:30 p. m. His morning sermon was a strong and earnest exhortation to parents, and their duties in home life. He handled his subject well and if his advice was followed, even partially, what a happy home would be. His mother, father, children and all. Brother Cullom gave an interesting and instructive talk on "Mission work" at 10:30 p. m. His sermon was a timely and inspiring one, showing the beginning of first Missionary works; colored diagrams representing the strength of the different faiths from Christianity on through to Paganism and an outline of the different Mission stations. Only an opportunity of hearing the talk, can do full justice to it, and I believe all who heard felt that it was a timely and instructive talk and that it was "good to have been there."
